

Science Fair Judge
Eliot Middle School
March 16, 2011

Jena Johnson:

I really enjoyed it - it was especially great getting to talk to the students about their projects. It was the first year that Eliot had run this science fair so attendance was a bit low, which was a little disappointing since some of the winners weren't there, but overall it was a great experience.

Erika Swanson:

It went well. It was great to see what kids can come up with. There was one about what material (out of hair, leaves, and I forget what else) absorbs oil from a spill the best. I'm really glad I got to be a part of this.
